Experience

Software Engineer (Full-time)

iQuadra Information Services

Nellore, AP

Aug 2025 – Present

Tech Stack: React.js, Tailwind CSS, Node.js, FastAPI, OpenAI API, MongoDB, SQL

- Architected and built advanced systems including **WebRTC-based video/audio consultation**, **teleprompter recording**, and **real-time transcription/word detection**.
- Reduced **frontend build size by 40%** and applied caching strategies, improving performance and load time.
- Developed an **AI-powered healthcare agent** that assesses symptoms, provides personalized guidance (exercise, diet, home remedies), and escalates users to doctors during serious or emergency cases with consent.
- Built a **Conversational AI chatbot** for product platforms to resolve user queries related to products, services, and personalized account information.

Software Engineer Intern

iQuadra Information Services

Nellore, AP

June 2024 – July 2025

- Optimized **Redux Toolkit** state management, removing **1000+ lines of code** and improving maintainability.
- Resolved **50+ critical production issues**, reducing downtime by **20%** and improving system stability.
- Designed and built the **SME (Subject Matter Expert) scheduling feature**, enabling users to seamlessly schedule meetings with experts.
- Created an **admin dashboard** for managing student class tests with **pagination, filtering, sorting, and caching**, improving dashboard load performance by **10%**.

Projects

Mora

[GitHub](#)

- Built a **privacy-first Chrome extension** to track **exact time spent per website**, using **local-first storage** with secure cloud sync.
- Executed **AI-driven productivity insights** to analyze browsing patterns and suggest **focus improvements**.
- Engineered **background and content scripts** for accurate time tracking without degrading **browser performance**.

react-hook-granth

[GitHub](#)

- Developed and published an **open-source React hooks library** featuring **20 reusable utility hooks** to simplify frontend development.
- Achieved **98% test coverage** using **Vitest**, ensuring reliability and edge-case safety.

OpenBooks API

[GitHub](#)

- Engineered a **production-grade backend system** exposing **10 public REST APIs** with **rate limiting** and robust validation.
- Implemented **scheduled automated data ingestion** to scrape, normalize, and **update the database**, managing **1,000+ records**.
- Authored APIs with **pagination, search, filtering, and sorting**, significantly improving API usability and scalability.

Skills

Languages: C, C++, JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, React Query, HTML, CSS, Tailwind CSS, Bootstrap

Backend & Databases: Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, Redis

GenAI & Systems: LangChain, OpenAI API, WebSockets, WebRTC, Web Scraping

Tools & Testing: Git, GitHub, GitHub Actions, Postman, Jest, Vitest, React Testing Library (RTL)

Education

Aditya University

Bachelor of Technology in Computer Science

Sept 2021 – May 2025

CGPA: 8.11

Achievements & Leadership

- 700+** problems solved on [LeetCode](#).
- 600+** problems solved on [GeeksforGeeks](#).
- Hosted **10+ coding contests** as a **problem setter** and mentored juniors in **DSA**.
- Actively contributed to **5 open-source** projects, resolving **6 issues** including bug fixes, documentation, and feature enhancements.
